## Summary

I am a Full Stack Developer who builds web products from frontend all the way to backend. I work on user interface development, backend architecture, APIs, databases, and product design. Furthermore, I have hands-on experience with React, Next.js, Node.js, Express.js , Nest.js, RESTful APIs and many database technologies. I build web applications with these tools while applying rules, for web application security and performance improvement.

## Education

|                                              |                                 |
|----------------------------------------------|---------------------------------|
| <b>Egyptian E-Learning University (EELU)</b> | Bachelor's Degree • In Progress |
| Computer Science and Information Technology  | Egypt • 2026 – Present          |

## Experience

|                                               |                             |
|-----------------------------------------------|-----------------------------|
| <b>- Albait Design For Software Solutions</b> | Kuwait . Remote . Full-time |
| <b>Front-end developer</b>                    | 07/2023 - 03/2025           |

- Developed web interfaces that work well on all devices and turned UI/UX designs into working frontend experiences.
- Built admin dashboards and websites that customers use, focusing on easy to use features how they look on devices and making user interface compatible.
- Helped with projects that use ASP.NET including doing frontend work with Blazor.
- Worked on the creation of SmartMind, an educational platform in Kuwait, providing the frontend parts, dealing with backend API'S and managing the UI/UX for learners

|                                                  |                   |
|--------------------------------------------------|-------------------|
| <b>- Freelance . Fivem community development</b> | Remote            |
| <b>Full stack developer</b>                      | 10/2024 - Present |

- Developed full-stack web applications across frontend, backend, database, authentication, deployment layers, and AI-powered functionality.
- Built interfaces with React, Next.js, Tailwind CSS and backend services, with Node.js and Express.js.
- Designed and developed custom web interfaces and digital experiences for the FiveM development community, translating UI/UX Designs into responsive, production-ready implementations.

## Projects

### Travel With Friends – Full-Stack Travel Platform

Next.js 15 · React 19 · TypeScript · Tailwind CSS 4 · PostgreSQL · NextAuth · Radix UI · Leaflet · Framer Motion

- **End-to-end travel application** for destination discovery, tour booking, regional exploration, AI-driven itineraries, and representation management. Owned both product design and development

www.twf.tours

### Paws-Safe – Peer-to-Peer Pet Adoption & Fostering Platform

Next.js · Auth.js · Supabase · PostgreSQL · Messaging · Notifications

- **Developed and mentored a UWE Bristol graduate project** featuring adoption/foster listings, advanced search, detailed profiles, structured applications, contact requests, notifications, direct messaging between pet owner and requester.

www.paws-safe.vercel.app

### MFA Security Testing Lab

Keycloak · OAuth 2.0 · Node.js · Express · Wazuh SIEM · RBAC · Docker · Proxmox · WireGuard

- **Controlled Security Lab for CSE Connect Exceler8or 2025 and submitted to NCSC.** Technical mentor who oversaw and develop the creation of scenarios that included simulations of brute force attacks, MFA fatigue, TOTP removal, session hijacking, and privilege escalation on both Keycloak and Node.js, using Wazuh for detection, automatic IP blocking, and response through PICERL.

## Skills

### </> Frontend Development

HTML5, CSS3, Sass, JavaScript, TypeScript, jQuery, React, Redux, Next.js, Tailwind CSS, Bootstrap

### Backend Development

Node.js, Express.js, NestJS, Redis, Prisma ORM, JWT, OAuth2

### Databases

MongoDB, PostgreSQL, MySQL, SQL

### Web Security

Web Application Security, Network Reconnaissance, Log Analysis, Vulnerability Assessment, Incident Response

### DevOps

Git, GitHub, Docker, CI/CD

### Design

Figma, Responsive Design, Web Performance
